

TAKEOVER'26 HACKATHON

Flow *AI Sales Ops*

Automate Sales. Intelligently.

An autonomous AI agent that executes end-to-end sales operations — from inbound enquiry to CRM dispatch — securely and instantly.

Team [Hackarena.dev](https://hackarena.dev) | TakeOver'26 Hackathon

Autonomous

End-to-end sales workflows executed by AI with zero manual intervention.

Intelligent

RAG-powered pricing retrieval and NLP intent extraction in real time.

Enterprise-Grade

Built on FastAPI, PostgreSQL, and OpenAI with human-in-the-loop controls.

THE PROBLEM

The B2B Sales Bottleneck *is Costing You Deals*

The Pain Points

Wasted Daily

Sales reps manually reading emails and typing quotes.

Hours

Error Rates

Pricing mistakes and missed CRM follow-ups.

High

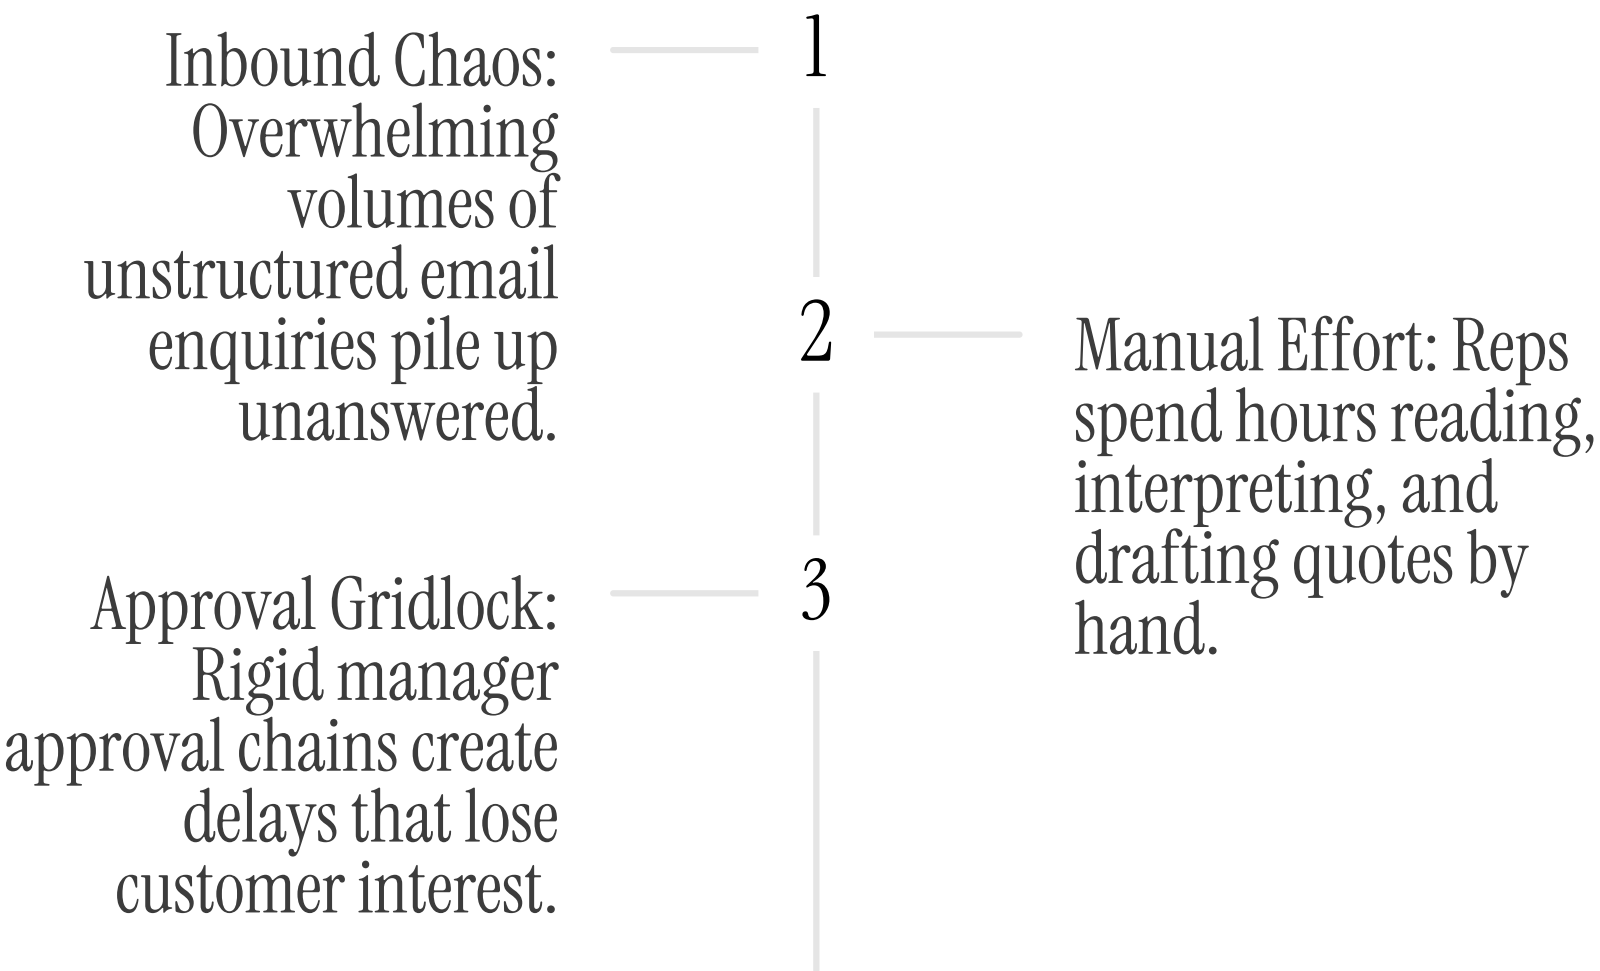

Customer Interest

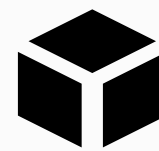

Manager approval delays kill deal momentum.

Lost

The Broken Pipeline

Every stage of the manual sales process introduces friction, delay, and risk.

OUR SOLU

Meet Flow — *Your Autonomous Sales Agent*

An autonomous AI agent that executes end-to-end sales operations securely and instantly. Flow handles everything from intent comprehension to CRM dispatch — so your team closes deals, not tickets.

Instant Intent Comprehension

Flow reads and understands customer enquiry emails instantly using advanced NLP, extracting intent, product requirements, and urgency with zero manual effort from your team.

Real-Time RAG Pricing

Retrieval-Augmented Generation pulls live pricing data directly from your knowledge base, ensuring every quotation is accurate, up-to-date, and hallucination-free.

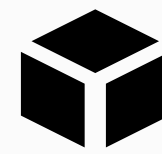

Dynamic PDF Quotations

Flow dynamically generates mathematically precise, professionally formatted PDF quotations tailored to the customer's exact requirements — delivered in under 60 seconds.

One-Click Approval & CRM Sync

Automated human-in-the-loop approval workflows and seamless CRM dispatch eliminate bottlenecks while keeping managers in full control of every deal.

WORKFLOW

One Enquiry = One Autonomous Workflow

End-to-End Automation

From the moment a customer sends an email to the instant their quote lands in the CRM, Flow handles every step autonomously — with a human checkpoint at the critical approval moment.

Zero Manual Touchpoints

NLP Extraction — Customer intent, product specs, and urgency parsed in milliseconds.

RAG Retrieval — Live pricing data pulled with zero hallucination risk.

CRM Dispatch — Approved quotes logged and sent seamlessly, automatically.

ARCHITECTURE

Built for Enterprise Scale

Flow is architected on a modern, high-concurrency stack designed for reliability, speed, and zero-compromise security across all sales operations.

Core Stack

- 1

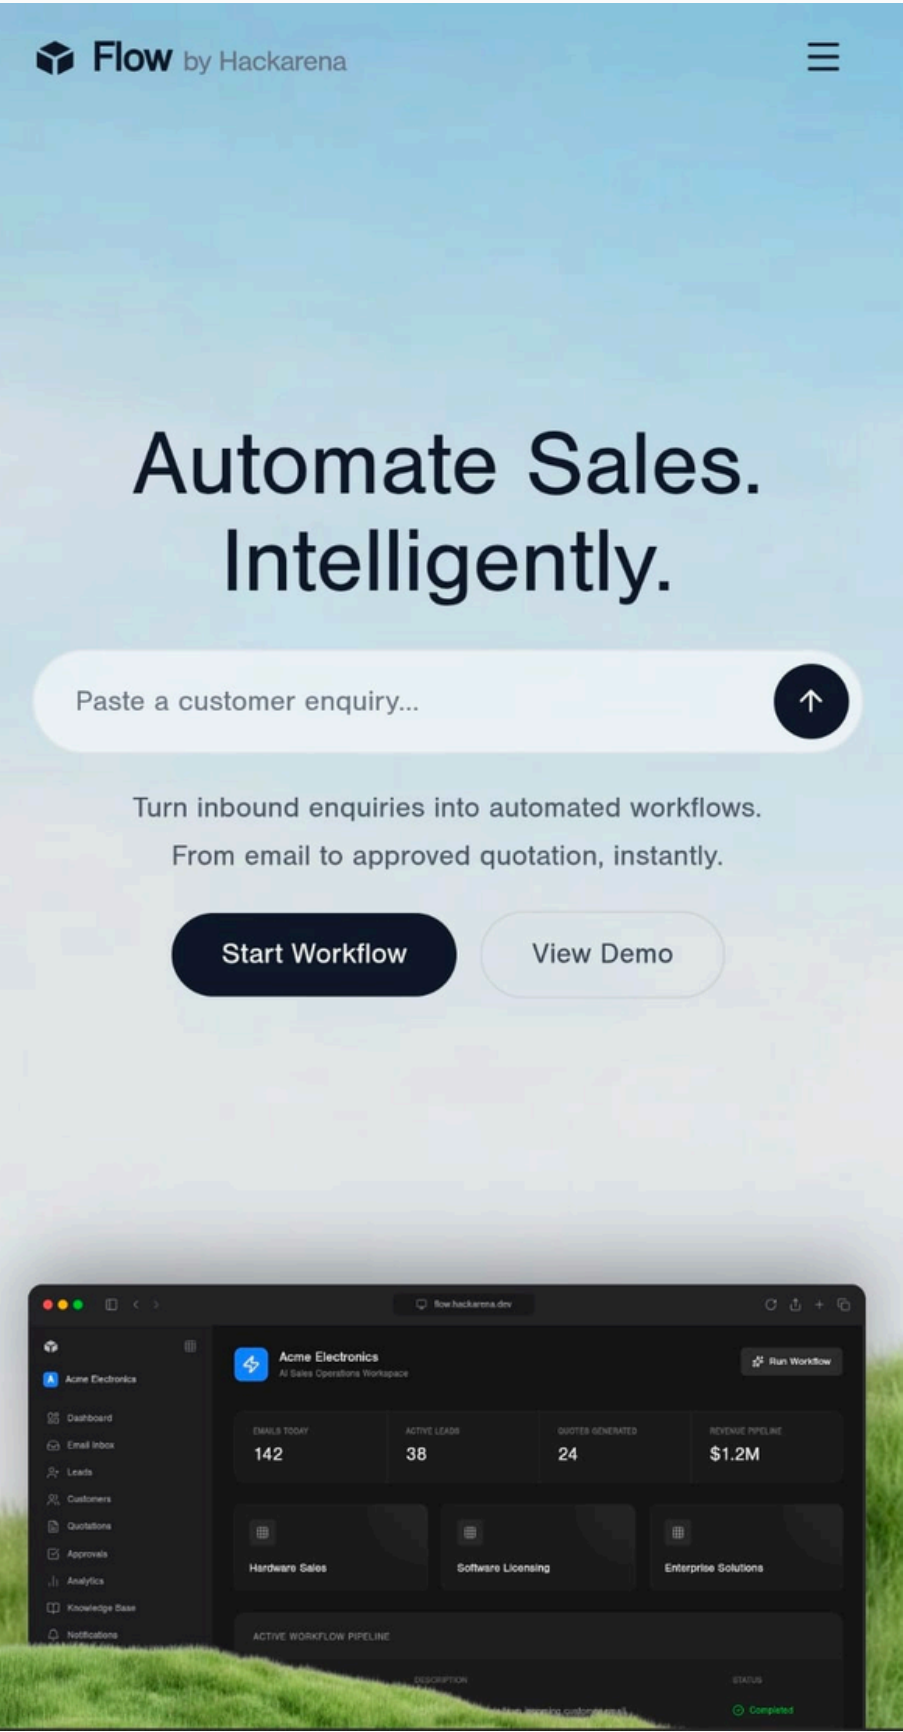

Frontend — React, TypeScript, Tailwind CSS & Framer Motion for a native-feeling management dashboard
- 2

Backend — FastAPI & PostgreSQL delivering high-concurrency and full transactional integrity
- 3

AI Engine — OpenAI/Groq via Agentic Tool Calling & RAG ensuring zero hallucinations in pricing
- 4

Integration — Human-in-the-loop approval layer with CRM sync and PDF generation pipeline

IMPACT

Measurable Impact & *Future Scope*

Business Impact

95%

Reduced Manual Sales Operations

Automates repetitive tasks such as quotation generation, CRM updates, and follow-up scheduling.

<1min

Faster Response Time

Generates quotations and initiates workflows within seconds of receiving a customer enquiry.

100%

Pricing Accuracy

Applies company pricing rules and generates standardized quotations consistently.

Roadmap

Live Gmail Webhooks

Real-time inbound email processing without polling delays.

Native Salesforce Sync

Bi-directional CRM integration with full field mapping.

WhatsApp Automation

Extend Flow's reach to WhatsApp Business enquiry channels.

Direct ERP Integration

Connect pricing and inventory directly from enterprise ERP systems.
